COMPO-ART
THE LAWRENCE METHOD - PAT APPLIED FOR
AN ART CONSTRUCTION GAME
You build the picture - not draw it!

Endorsed by Art Instructors
C. F. LAWRENCE

COMPO-ART is an invention which enables a child to create innumerable original compositions for coloring with crayons or water colors.

COMPO-ART meets a need, always sought by educators, for a means to stimulate imagination and to satisfy the natural desire to express one's self through pictures.

The pattern sheets consist of objects which have been practically tested for correct perspective in relation to the other objects. Grouping these is a fascinating game which unconsciously teaches the fundamental principles of art composition.

The advance this method makes over those which consist of mere copying or coloring of printed pictures is obvious to every parent and teacher. There is added to the pleasure of cutting and tracing, surprise and gratification over having produced an original composition.

COMPO-ART opens the avenue of picture making to the child who lacks the natural ability and the training to draw. It will interest the older child as well as the young; as any degree of skill may be employed. It will provide unlimited hours of quiet entertainment.
COMPO-ART

The Lawrence Method for Amplified Art
AN ART CONSTRUCTION GAME
You build the picture - not draw it!

Endorsed by Art Instructors

COMPO-ART is an invention which enables a child to create innumerable original compositions for coloring with crayons or tempera paints. The artist, given a pattern with suggested colors, can make an original painting. Changing these is a handicraft game which simultaneously teaches the fundamental principles of art composition.

The principles in use over these works consist of: a strong, clear, eye-catching drawing; good composition with the eye being led from one part of the picture to another; an idea with clear and distinct outlines, and figures making up the composition being rendered at a distance.

COMPO-ART offers the means of picture making: the child, who, with the natural ability and love to draw, will learn to create, develop, and improve his potentialities. It will instruct the child in the art of art and will bring about a constant need for new materials to be used. It is the only method that offers the child the opportunity to create original work on his own initiative and use his own imagination to their best advantage.
