COMPO-ART

The Lawrence Method - Pat Applied For

An Art Construction Game
You build the picture - not draw it!

Endorsed by Art Instructors
C. E. Lawrence

COMPO-ART is an invention which enables a child to create innumerable original compositions for coloring with crayons or water colors. COMPO-ART meets a need, always sought by educators, for a means to stimulate imagination and to satisfy the natural desire to express one's self through pictures.

The pattern sheets consist of objects which have been practically tested for correct perspective in relation to other objects. Grouping these is a fascinating game which unconsciously teaches the fundamental principles of art composition.

The advance this method makes over those which consist of mere copying or coloring of printed pictures is obvious to every parent and teacher. There is added to the pleasure of cutting and tracing, surprise and gratification over having produced an original composition.

COMPO-ART opens the avenue of picture making to the child who lacks the natural ability and the training to draw. It will interest the older child as well as the young; as any degree of skill may be employed. It will provide unlimited hours of quiet entertainment.

COMPO-ART
AN ART CONSTRUCTION GAME
You build the picture - not draw it!

Endorsed by Art Instructors
U. S. LAWRIE

COMPO-ART is an invention which enables a child to create in-
vivo, immaterial original compositions for coloring with crayons or
water colors. In addition to stimulating imagination, it enables the
child to express his ideas by drawing.

For pattern books of objects which have been previously
adapted for use with COMPO-ART, write to the address
