COMPO-ART

THE LAWRENCE METHOD - A PAT APPLIED FOR
AN ART CONSTRUCTION GAME
you build the picture - not draw it!

Endorsed by Art Instructors
C. E. LAWRENCE

COMPO-ART is an invention which enables a child to create
innumerable original compositions for coloring with crayons or
water colors.

COMPO-ART meets a need, always sought by educators, for a
means to stimulate imagination and to satisfy the natural desire to
express one's self through pictures.
The pattern sheets consist of objects which have been practically
tested for correct perspective in relation to the other objects. Grouping
these is a fascinating game which unconsciously teaches the funda-
mental principles of art composition.

The advantage this method makes over those which consist of mere
copying or coloring of printed pictures is obvious to every parent and
teacher. There is added to the pleasure of cutting and tracing, surprise
and imagination are given the child producing an original composition.

COMPO-ART opens the avenue of picture making to the child
who lacks the natural ability and the training to draw. It will interest
the average child as well as the young, any degree of skill may be em-
ployed. It will provide endless hours of quiet entertainment.
